# *Hotel Towels and Bathrobes:*

**Hotel towels and bathrobes are significant elements that showcase the value hotels place on their guests. These products assist guests in experiencing a comfortable and relaxed stay. There are specific factors to consider when selecting such products. The absorbency, softness, and size of the towels and bathrobes are essential. Hotel towels and bathrobes are usually made of cotton, which is why they have high absorbency, are very soft, and comfortable.**

# HOTEL TOWEL VARIETIES

The colors of towels and bathrobes should be in line with the overall concept of the hotel. Hotel towels and bathrobes are usually preferred in white. However, some hotels may also choose different colors for towels and bathrobes.

- If requested, the hotel's logo can be embroidered onto the towel. Logo embroidery comes at an additional cost. The price can vary based on the size and color of the logo.

## TYPES OF TOWELS

# SPA TOWELS

A spa towel is a special type of towel used in spas and massage parlors. Spa towels are typically made from cotton with high absorbency or from terry cloth. As a result, spa towels quickly absorb and dry when they come into contact with water.

*Spa towels and Turkish bath towels are generally white in color. However, some spa parlors may opt for towels in different colors. Spa massage towels are usually of a larger size. This allows spa visitors to wrap themselves comfortably and dry off.*

Compared to other towels, it absorbs water 250% faster, dries 50% quicker, and appears 133% more voluminous, making it a highly preferred towel type. Spa massage towels are distinct from other towels due to their softness and plush weave. Thus, spa towels offer spa visitors a comfortable and relaxed experience.
